Canopy Pediments

Cladding

Plastic Wood Gates

## Maintenance free, low carbon building materials in award winning plastic wood

**No Maintenance | Long Life | Cost Saving**

Kedel's Plastic Wood was named 'Best Recycled Product' at the National Recycling Awards 2015..

Kedel plastic wood is the ideal maintenance free replacement for wood and other traditional building materials.

Suitable applications include canopy pediments, gallows brackets and posts, cladding, decking, fencing, back gates, tongue and groove, rafter tails, fascias and soffits.

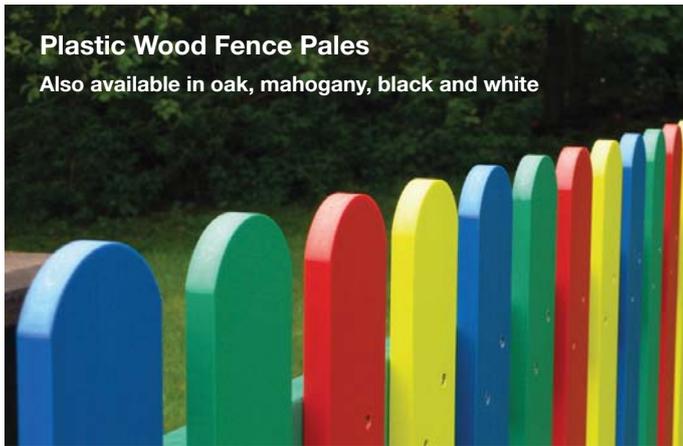

There are over 1000 products in recycled plastic available on our website and we also offer comprehensive design, testing, as well as CNC cutting, routing and drilling services, in case you need something special.

### Benefits of recycled wood:

- Does not rot
- Huge lifetime cost savings
- Lower carbon footprint
- Water, frost, insect and mould proof
- Wide variety of profiles to choose from
- No splinters, cracks or warping
- Graffiti easy to remove
- Colour Fast - UV Protected to the highest levels

**Reduce, Reuse, Recycle**

**Plastic Wood Fence Pales**

Also available in oak, mahogany, black and white

Plastic Wood Profiles eliminate maintenance costs, and being 100% recycled plastic they also facilitate carbon neutral building

**Gallows Brackets**

**Plastic Wood Finials**

**Bin Enclosures**

**Gates with T & G Inlay**

**Rafter Tails**

**Fence Panels**

**T & G Cladding**

**Decking and Benching**

**Plastic wood building accessories allow you to offer more to your clients -**

- Reduced long term costs from savings on maintenance and replacement of wooden products
- UV protected colour fast materials that need no painting or refurbishment
- low carbon eco friendly buildings
- a sustained quality appearance for life

Your Housing's Partington Manager, Paul Stanners says:  
*"I thought it was rather expensive to begin with, but since we began installing these fence panels we have not had to replace a single one in over 5 years. Our maintenance and replacement costs have disappeared."*

**T & G Back Gates**

*'The building industry is recognised as a major contributor to global CO2 emissions. The European Union launched the Energy Performance of Buildings Directive in 2006, and the UK Government launched its Code for Sustainable Homes the same year requiring all new dwellings to be carbon neutral by 2016, and non-dwellings three years later.'*
