

Kedel Recycled Plastic Furniture

Eco-Friendly, modern, custom designed, outdoor furniture, for residential and commercial applications. Durable recycled plastic sourced in the UK, and requiring no maintenance.

Made with superior grade, recycled, high density polyethylene (HDPE), this HDPE has an attractive, aesthetic and scratch resistant finish. The plastic furniture has a modern, yet timeless and refined look, and is much heavier than thin-gauge moulded plastic outdoor furniture. High grade stainless steel fasteners hold everything together, forever.

The Kedel furniture range harks back to the ideals of the Arts and Crafts movement, very durable, superiorly crafted and designs to suite domestic and commercial settings.

HDPE is high density polyethylene - a plastic used in products and packaging such as milk jugs, detergent bottles, tubs of spread, and juice bottles. Post consumer HDPE is a material or finished product that has served its intended use and has been diverted or recovered from waste destined for disposal in land fill. About 35 recycled milk bottles (4 Pint) are used for every Kilo of plastic we use. Each kiddie chair contains 350 recycled milk jugs, and at the end of its life, your chair can be recycled into something else.

Key Features

- 100% British Recycled Plastic - 100% post consumer and post industrial recycled hi density polyethylene
- Incredible durability - will not rot or splinter
- Low maintenance - you will never need to paint or stain this material
- Designed for outdoor living - no need for seasonal storage
- Classic designs with modern lines for a contemporary clean aesthetic look
- High UV stable

Reduce, Reuse, Recycle

Kedel Kiddie Chair

The Kedel Kiddie chair is ideal for kids ages 1 to 10 years and is perfect for use outdoors or indoors in the playroom. Made from durable, washable, and recycled high density polyethylene (HDPE; paints, ice cream, juice, and any less desirable spills are no match for these chairs. I only wish we made children's car seats that were this easy to clean.

The Nanpan Chair

Our Garden Chair is from a range of recycled plastic garden furniture exclusive to Kedel. Our young product designer is from a new generation of environmentally conscious designers, who are keen to create ethical products, which are eco-friendly, yet have aesthetically pleasing looks that appeal to both commercial architects and designers, as well as the domestic user.

Fade-free

The HDPE that's used will not fade or change colour. You will never have to paint or stain the furniture.

Maintenance-free!

Leave it out year round, hose it off with a garden hose in the Spring and enjoy. It's that easy. This furniture will not, fade, warp, rot, require paint or stain or any on-going maintenance to keep its beautiful appearance, so you can spend more time relaxing.

x 350 =

Each small chair contains the equivalent of 350 recycled plastic milk cartons
