

– a quick, easy to install ground cover solution for both temporary and permanent applications!

Any firm base is sufficient to support these recycled plastic eco slabs.

The hexagonal shaped slabs are easy to handle, and connect securely to each other via strong linking hooks, enabling rapid installation. The recycled plastic material can be worked with normal wood working tools, and the visible lines on the surface make it easy to align corners and achieve straight edges for a truly professional finish.

*Eco slabs are available in both solid as well as slotted for additional drainage. Available in both grey and brown colours.*

Depth	Width	Diagonal Width	Type	Weight	Colour
cm	cm	cm		approx	
4.0	40.0	46.0	solid	1.7 kg	grey + brown
4.0	40.0	46.0	slotted	1.7 kg	grey + brown
Weight per m <sup>2</sup> (approx. 7 slabs)				11.9 kg
