

| Specification  |  |  |
|--|--|--|
| <b>Description</b>   | <b>Kedel Ultra</b> , the stiffest of the Kedel mixed plastic blends, offers good impact resistance & bending strength. The surface has the appearance of timber with even colour. Contains polyolefins (HDPE & LDPE) & styrenes. 100% Recycled post industrial & consumer waste plastic. |  |
| <b>Production Process</b>  | A blended polymer, fed into molds under high temperatures and pressures.   |  |
| <b>Finish</b>  | The surface is knot free, evenly coloured, with a textured surface.  |  |
| <b>Properties</b>  | <ul style="list-style-type: none"> <li>◆ Maintenance free</li> <li>◆ Durable</li> <li>◆ Can be worked as wood</li> <li>◆ Splinter free</li> <li>◆ Frost proof</li> <li>◆ Impervious to fungi and insects</li> <li>◆ Does not leach toxic substances</li> </ul>                           | <ul style="list-style-type: none"> <li>◆ Wear resistant</li> <li>◆ Will not rot</li> <li>◆ Environmentally friendly</li> <li>◆ 100% recycled and recyclable</li> <li>◆ Insulating</li> <li>◆ Acoustic sound proofing</li> <li>◆ Shock proof and flexible</li> <li>◆ Resistant to most chemicals</li> </ul> |
| Performance  | Properties   | Example Values   |
| <b>All figures quoted are typical values and for guidance only</b> | Density  | 0.99 g/cm <sup>3</sup>   |
|  | Thermal expansion coefficient  | 0.11 mm/m/°C   |
|  | Moisture absorption (ISO 175)  | <0.2 wt%   |
|  | Slip resistance in dry (BS 7976-2)   | Low slip risk - 49   |
|  | Slip resistance in wet (BS 7976-2)   | Low slip risk - 41   |
|  | Tensile modulus (ISO 527-2)  | 1445 MPa   |
|  | Tensile strength (ISO 527-2)   | 15 MPA   |
|  | Flexural modulus (ISO 178)   | 1225 MPa   |
|  | Flexural strength (ISO 178)  | 30 MPa   |
|  | Impact resistance un-notched (ISO 179)   | 14 KJ/m <sup>2</sup>   |
| <b>Chemical Stability</b>  | Resistant to most common chemicals - contact us for specific info  |  |
| <b>Typical Uses</b>  | Ideal for extreme loading - fence rails, floorboards, beams & sleepers and challenging environments where durability and strength count.   |  |

# KEDEL

ECO-FRIENDLY PLASTIC PRODUCTS

About us

Sustainable ideas

## What's the big idea?

This family business was founded on ethical and ecologically sound principles.

We wanted to make sustainable living attractive - easy to incorporate into our personal and working environments.

We believe this will bring us all healthier, happier lives, a much better future, infinitely sustainable, for all generations to come.

## How will we make it happen?

'Together' is the only way we will be able to protect the future successfully.

We will work with architects, specifiers, builders, local authorities, housing associations, and all our customers, both commercial and domestic, to pool our most innovative ideas.

We will recycle plastic in ever more novel ways, like those you see here.

We will use British recycled plastic.

*Recycled plastic from Asia has a huge carbon footprint due to transportation and is very far from environmentally friendly.*

Production of recycled plastic releases **250% less CO2** into the atmosphere than production of virgin plastic.

## It's the law

The construction industry will be responsible for 1/5th of all greenhouse gasses by 2025.

Use of recycled materials is already a legal requirement in new build and refurbishment of housing stock.

The Government's target is to ensure we construct only carbon-zero dwellings by 2016.

## Don't wait

It will save you time and money right now!

Maintenance and replacement costs are substantially reduced through the use of our recycled plastic building materials.

Payback of your initial investment is estimated to be in as little as 2 - 4 years.

**Get a reputation for the maintenance free quality of your building projects.**

**Call us now on 01282 861325.**
